## SUMMARY

Full-stack developer with strong problem-solving and logical thinking skills, experienced in building scalable systems using React, Node.js, FastAPI, and PostgreSQL. I design secure, production-ready applications with clean architecture and optimized performance. Comfortable taking ownership of features end-to-end in remote, collaborative environments.

## EDUCATION

**Don Bosco Institute of Technology — B.E. in Information Technology** **(2023–2027)**
GPA: 7.61/10

## PROJECTS

**Judexa – AI-Native Hackathon Judging Platform** **(Dec 2025 – Jan 2026)**
- Built AI-driven judging system (5-agent orchestration) reducing manual workload by **70%**.
- Developed FastAPI + PostgreSQL (RLS) backend with **<200ms API latency**.
- **Implemented real-time leaderboard with automated weighted scoring and feedback generation.**

**DataForge – Dataset Profiling & Cleaning Platform** **(Jan 2026 – Present)**
- Engineered DuckDB-based zero-copy profiling, cutting preprocessing time by **60%.**
- Built automated cleaning pipeline improving data quality scores by **30–50%**.
- **Designed JWT-secured REST APIs supporting multi-format dataset ingestion.**

**CareConnect – Volunteer & NGO Platform** **(Jul 2025 – Oct 2025)**
- Created a centralized **NGO-volunteer engagement platform** with accessibility optimization.
- Streamlined connections for outreach and donation management.
- **Tech Stack:** React, Node.js, Express.js, MongoDB, REST API, Bootstrap.

## CERTIFICATIONS

- **AI Mastermind :** 16-hour applied AI innovation marathon using Python, OpenAI API, and ML.
- **Google GenAI Study Jam, GDGC DBIT** :Built AI apps on Vertex AI integrating NLP and real-time text analysis.

## ADDITIONAL INFORMATION

**Technical Skills:** JavaScript, Python, Go, React, Express, Django, Machine Learning, Agentic AI, Blockchain
**Achievements**: Chairperson, CSI-DBIT | 2× Hackathon Finalist
**Volunteer Experience**: Event Head & Volunteer for Codeverse, Euphoria, and Malhar Fest
